

AIwareness

An interactive quiz that trains people of all ages to tell real photos from AI-generated ones, ready for your hub to bring into your wider community.

REAL OR AI? · A QUIZ · A TRAINING PHASE · ALL AGES · YOUR LANGUAGE

01 WHAT IS AIWARENESS?

AIwareness is a two-phase web tool. First, a quick right or wrong quiz asking "real or AI-generated?", drawing from a shared image bank. Then, a training phase that walks back through each image, in each hub's own language, explaining what gives away AI-generated content.

It is open to anyone, of any age, and it asks for birth year to see how accuracy varies across generations. Hubs are encouraged to bring it beyond Shapers, into their wider local community. [Global Shapers Valencia](#) built the app and handles all deployment, the database, and maintenance. **Your hub only contributes content.**

WHAT WE NEED FROM YOUR HUB

- **Images.** Pick from our shared image bank, or send us new real and AI-generated photos for your hub.
- **A short template filled in.** Your hub's language, city, chosen images, and local explanations.
- We handle all the technical setup for you.

WHAT YOUR HUB GETS IN RETURN

- **Your city in the app's hub selector.** Your community takes the quiz in their own language, Shapers and beyond.
- **A ready-to-use AI-literacy activity** for events and workshops, with zero infrastructure cost. Valencia Hub hosts everything on a free-tier plan.
- **Cross-hub statistics.** Your results feed into accuracy data by country, hub, and age group, plus direct support throughout onboarding.

02 HOW TO GET STARTED

01

Contact Valencia Hub

Reach out to confirm interest and receive the template.

02

Send your images

Pick from the shared bank, or share new ones for your hub.

03

Fill in the template

Your hub's language, city, and local explanations.

04

We take it from here

Valencia Hub sets it up and deploys. Your hub goes live.
